

DiagnosticSource[®] provides real world insights into diagnostic orders and results across the enterprise—clinical, HEOR, new product planning, commercial operations, and brand management.

DiagnosticSource[®] at a glance

DiagnosticSource[®] provides timely patient-level insight into diagnostic test orders and results across a broad range of disease states enabling use cases across the clinical and commercial continuum. It provides real world insights with extensive data, a comprehensive network, and high linkability to Symphony's patient claims repository.

Comprehensive coverage

290M+

est. patient lives covered by
Lab Partner Network

275M+

unique diagnostic patient
encounters per year

5B+

test results
Annually

4K+

Assays

250K+

patients with NextGen
Biomarker data

3–5

years of history

DiagnosticSource[®] includes¹:

- **Test:** Name, number/code, result description, and interpretation
- **Physician:** NPI, first name, last name, and specialty
- **Account:** Name, address, city, and state
- **Patient:** SynomalD^{®2}, gender, and age

Additional information such as treating physician, diagnosis and treatment, payer, and follow up visits can be derived using patient data.

¹ Final layout and data elements may vary by lab partner

² SynomalD[®] is the patient identifier reported within Symphony deliverables.

Greater understanding of diagnosis, treatment, and the patient journey with Synoma

Native linkage to Symphony patient claims data, powered by Synoma to enable HIPAA compliance, results in match rates >95%.

The combination of DiagnosticSource® data and Symphony's patient data powers greater insight into diagnosis, treatment, and the patient journey, which helps:

→ **Right-size target patient population**

→ **Optimize commercial strategy**

→ **Drive diagnostic education**

→ **Enhance patient journey**

Features	Benefits
Diagnostic test order and result information including test name, ordering physician, account and patient information	Extensive view of diagnostic data enabled by a multitude of data attributes
Comprehensive ecosystem of laboratory partners providing broad disease state coverage	Lower total cost of ownership (TCO) as Symphony contracts directly with lab partners
Link to Symphony patient data claims through our proprietary Synoma tokenization technology, patient match rates are typically >95%, and as high as 99%	More comprehensive view of the patient — additional insight into treating physician, patient diagnosis, follow-up visits and payers
Enables HIPAA compliance both on its own and when linked to Symphony's extensive patient data	Commitment to privacy means you can use data with confidence
Flexible delivery schedule — one-time, quarterly, monthly, weekly or daily (limited)	Faster speed to insight with 100% of tests available weekly and select tests available daily
Variety of delivery options — flexibility to select any combination of lab partners and different levels of data access	Price effective — a broad range of options means you only pay for what you need

Speed to Insight

100% of tests available weekly and select tests available daily. DiagnosticSource® is offered in a variety of delivery options to meet your needs:

Transactional Data

De-identified patient-level diagnostic test data, appended with Synoma ID^{®3}

Analytics

Diagnostic data used in specific analytical project engagements, such as a patient journey study or trigger program

Aggregation

Diagnostic data summarized (no de-identified patient level detail)

³ Our proprietary Synoma® tokenization technology enables de-identification of patient-level data. SynomaID® is the patient identifier reported within Symphony deliverables.

HealthVerity powers the nation's largest real-world data ecosystem, helping life sciences organizations access and connect claims, lab, EHR and consumer data in a privacy-compliant environment. Following the acquisition of Symphony Health, HealthVerity offers the industry's most comprehensive real-world data ecosystem. Learn more at healthverity.com
